ALUMINIUM EXTRUSION

INDUSTRIAL PRODUCTS

CUSTOM SOLUTIONS

ABOUT US

AcryTech — The Group of Industries specializes in Aluminium Extrusion Systems and Custom Industrial Solutions engineered for performance, flexibility, and durability.

From machine enclosures, safety fencing, and inspection tables to conveyor structures, workstations, and storage systems, we deliver modular solutions that streamline operations and support modern manufacturing environments.

Driven by precision engineering, quality craftsmanship, and customer-focused innovation, we transform aluminium extrusions into reliable solutions that power industrial growth.

MISSION

Our mission is to deliver world-class aluminium extrusion solutions and modular industrial systems that empower businesses to build safer, smarter, and more efficient work environments.

FULL IN-HOUSE SETUP

We are equipped with all the machineries and tools required to fulfill your requirement.

Aluminium Profile Cutting Machine (Full Bed)

Portable Cutting Machines

50+ Variety of Tools and Equipments

Full Stock of Aluminium Profile & Accessories

40+ Team Size

15,000+ Sq. Ft. of Working Area

Aluminium Enclosures

We specialize in manufacturing custom aluminium enclosures designed for industrial equipment, automation systems, machine integration, and workspace applications.

Aluminium Inspection Tables & Trolleys

Custom-built aluminium inspection tables and trolleys engineered to improve workflow efficiency, workplace ergonomics, and operational reliability across manufacturing and industrial facilities.

Aluminium Safety Fencing

Our aluminium safety fencing solutions provide robust machine guarding and area segregation, ensuring enhanced safety, visibility, and compliance across industrial and automated facilities.

Aluminium Conveyor Base Structure & Ladders

Custom aluminium conveyor structures and ladders engineered for efficient material handling, safe access, and durable industrial performance.

Aluminium Storage Racks & FIFO Racks

We manufacture custom aluminium storage racks and FIFO rack systems designed to optimize material organization, inventory flow, and workspace efficiency in industrial and manufacturing environments.

Aluminium Pipe & Joint Structures

We manufacture custom aluminium pipe and joint structures designed for workstations, assembly lines, material handling systems, and industrial applications, offering lightweight construction, flexibility, and easy reconfiguration.
