

COMPANY BROCHURE

MS FABRICATION PRODUCTS & SERVICES

ABOUT US

AcryTech — The Group of Industries specializes in Aluminium Extrusion Systems and Custom Industrial Solutions engineered for performance, flexibility, and durability.

From machine enclosures, safety fencing, and inspection tables to conveyor structures, workstations, and storage systems, we deliver modular solutions that streamline operations and support modern manufacturing environments.

Driven by precision engineering, quality craftsmanship, and customer-focused innovation, we transform aluminium extrusions into reliable solutions that power industrial growth.

MISSION

Our mission is to engineer and manufacture reliable industrial fabrication solutions that combine strength, precision, and innovation, helping industries achieve safer operations, greater efficiency, and sustainable growth.

FULL IN-HOUSE SETUP

We are equipped with all the machineries and tools required to fulfill your requirement.

15+ Welding Machines

Full Stock of MS Pipes and Accessories

Full Bed & Portable Cutting Machines

40+ Team Size

50+ Variety of Tools and Equipments

15,000+ Sq. Ft. of Working Area

Machine Structure | Heavy Frames | Conveyor Base Structure

Custom-built machine structures, heavy frames, and conveyor bases engineered for durability, precision, and high-performance industrial applications.

Machine Cabinets

We manufacture custom machine cabinets designed to provide secure, durable, and organized housing for electrical, automation, and industrial equipment in demanding operating environments.

Robots Cells

We manufacture custom MS robot cells designed to provide safe, durable, and efficient workspaces for robotic automation systems, ensuring reliable performance and operator protection in industrial environments.

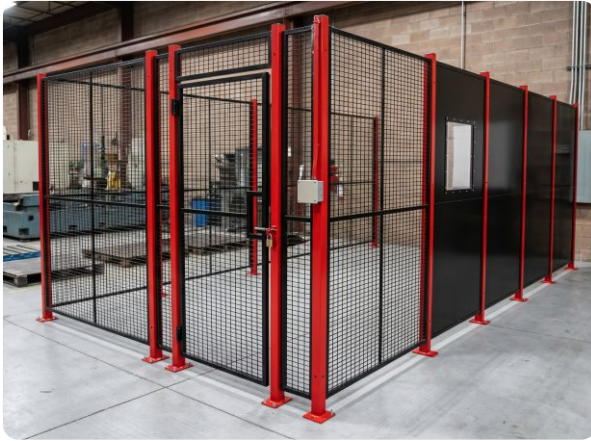

Robots/ Machine Safety Fencing

Our MS safety fencing solutions are precision-fabricated to provide robust machine guarding, area segregation, and enhanced workplace safety while ensuring durability and long-term performance.

Robots/ Machine Safety Fencing

Our MS safety fencing solutions are precision-fabricated to provide robust machine guarding, area segregation, and enhanced workplace safety while ensuring durability and long-term performance.

Inspection Tables

We manufacture custom MS inspection tables designed to support quality control, assembly, testing, and production processes, delivering durability, stability, and efficient workspace organization.

Mild Steel (MS) Trolleys

We manufacture custom MS trolleys designed for efficient material handling, storage, and transportation within industrial, manufacturing, and warehouse environments, ensuring durability and ease of movement.

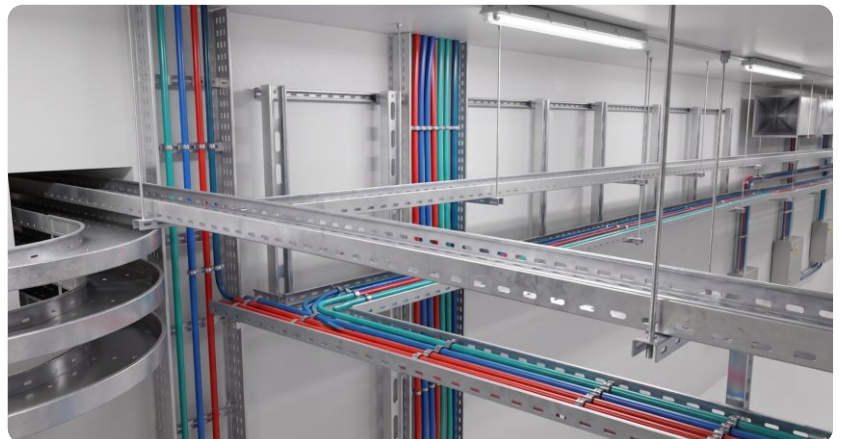

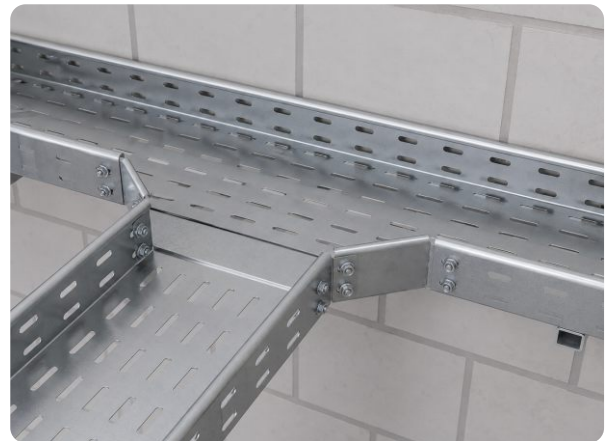

Mild Steel (MS) Cabinets

We manufacture custom MS cabinets designed to provide secure, durable, and organized storage solutions for industrial equipment, tools, components, and operational requirements.

Control Panel and Cable Tray

We manufacture custom control panel enclosures and cable trays designed for reliable equipment protection, efficient cable management, and long-lasting performance in industrial and electrical installations.

Full In-house Machine Setup

We are equipped with all the required machineries and tools required to fulfill your requirement.

Laser Cutting Machine

High-precision fiber laser cutting for MS, SS, aluminium, and other sheet metals with clean edges and consistent accuracy.

Sheet Metal Bending Machine

CNC press brake bending for precise angles and repeatable forming, enabling high-quality fabrication of custom sheet metal components.

Full Machining Setup

Complete in-house milling and turning capabilities for manufacturing precision parts, fixtures, prototypes, and custom machined components.

Powder Coating Setup

In-house powder coating facility delivering a durable, corrosion-resistant, and uniform finish for fabricated metal products.
